# Wireless 8"
# Digital Photo Frame

## 8 Inch
## 4:3 High Resolution Screen

## Care of the PhotoFrame

**1 Do not drop**
Photo Frame is a complicated electronic device and cannot withstand shock from being dropped.

**2 Do not expose to moisture**
Photo Frame is neither moisture proof nor moisture resistant. Exposing it to moisture or liquid of any kind will very likely damage your Photo Frame.

**3 Do not hit or scratch**
The LCD panel of Photo Frame is made of glass and is therefore sensitive to abnormal force and sharp edges.

**4 Screen cleaning**
Use only a dry soft cloth to clean your screen.

**5 Keep the stand clear from cables**
Make sure the stand of your Photo Frame is clear from cables as cables could pull the stand out of Photo Frame to the floor.

**6 Do not touch the power plug with wet hands, as this may cause electric shock.**

**7 Do not connect more than one appliance to a single outlet, as an overheated outlet may cause fire.**

**8 Do not use force to pull the power cord. Don't place anything heavy on the power cord, as this may cause electric shock or fire.**

**9 Make sure to turn the power off and disconnect the power plug from the outlet before moving the product. Make sure to disconnect the connection cables from other devices as well. Moving the product without disconnecting the power cord may damage it while moving, and may cause electric shock or fir e.**

**10 Do not install the product near any heating appliance. There is a risk of fire.**

## Features

• **Music Player**
MP3, WMA, OGG

• **Photo**
JPEG, BMP, GIF, PNG

• **Internet Service**
*Radio*
- Instant music broadcasting
- Browse channel by genre
- Back-up mode if network disconnect (to internal memory)

| | Language : Korean / English | |

## How to Upgrade the Firmware

**1** Download the Firmware.
We have two files.
**1) HDDFile.TCC"**
**2) Player.rom**

**2** Using USB Cable, connect the Photo Frame to the USB Port on your PC.

**3** The Photo Frame will be automatically connected in seconds and you may see "POPUP Window". Also you check the "Connected Mode" of the Screen of the Photo Frame.

**4** Now, Save the files as below,
1) "HDDFile.TCC" – Save to "CONFIG Folder" of Photo Frame.
2) "Player.rom" – Save to "Root Directory" of Photo Frame.

**5** Power on/off and then the upgrading is automatically operated. It takes about 3~4minutes.

**6** Check the Version in the Setup-General.

# Quick Starter Guide   <Model No. DPF-801W>

**1**
